

The diagram illustrates a system architecture with six layers. The top layer consists of three blue boxes labeled 'App'. The second layer has a gray box labeled 'Fair Scheduler' on the left and a brown box labeled 'Control Tower Scheduler' on the right. The third layer is a single dark blue box labeled 'Custom Kernel'. The fourth layer is a gray box labeled 'KVM'. The bottom layer is a gray box labeled 'Host Kernel'. A dashed line separates the top three layers from the bottom three layers.
